

Project Number: 13

Project Title: Android Drone

Team Members: Tim Gilligan (POC), Ishan Patel, Jimmy Jorge, Ivan Konatar, Dhruv Mana

Advisers: Gajic, Diez

Key Words: Android, Drone, Autopilot, PID, Arduino

Project Abstract:

Drones are increasing in popularity exponentially, but the hardware that they run on is obsolete. Our project, "Android Drone", utilizes the constantly updated hardware that android has to offer, and creates a faster, more reliable system, that anyone can enjoy. Simply plug an android device into a drone body, and you are ready to fly with the worlds' fastest drone hardware to date!
