Why?

• Provide students worldwide with a quicker, safer, and easier way to connect with classmates, share information, and receive tutoring.

Our Vision

• Motivations
  • A student community for sharing information, documents, resources, and tutoring services does not exist.
  • It is hard for some students to ask for help from others, especially if they are shy or feel inadequate. The creation of this site hopes to mitigate this problem.
• Objectives
  • We sought to create a platform that contains all of the tools that students need to achieve academic excellence all in one place.
  • Placing students in class communities that encourage academic excellence in order to enhance their college experience.

Design Hurdles

• Readability and Compatibility
  • Site features and design must be intuitive and function on all web browsers
  • Usability
  • Must ensure that users are engaged and fully utilizing features
  • User Traffic and Data Storage
  • Need to account for a very large size of user profiles and data due to the vast amount of schools and students in the nation

The Future

• Mobile Application
  • Expand to all Universities in the Nation
  • Group Notifications on Mobile Device
  • School Specific Authentication
  • Real Time Notification
• Personal Database for the website
• Marketplace for Student Resources
• Direct Messaging
• Tutor Rating
• Document Hosting

Acknowledgements

• We would like to thank our advisor and mentor, Dr. Hana Godrich. We would also like to thank the Rutgers ECE department for giving us the opportunities and resources to complete this project.
